1. The jet aircraft plants of Aero and Avia in the Prague area have made a slight reduction in personnel and made it possible for employees to leave the plants and seek other employment if so desired. Previously all workers in these two plants had been frozen and could not get a release from their jobs.
2. Pill boxes are being constructed on the roofs of many Prague apartment houses and office buildings. The pill boxes are being built above the elevator shafts of the buildings in question. They are being constructed in places where the location of a particular building is such as to give the pill boxes good fields of fire on main intersections, bridges, etc. The pill boxes are about three meters in size, and are made of reinforced concrete about 30 cm. thick.
